

Senior SDET (III) | Aspiring Site Reliability Engineer (SRE)

India | 📞 +91-9768368717

Email : Abhishek.Gupta2@EntainIndia.com

Professional Summary

- Senior Software Development Engineer in Test with 10 years of experience
 - Specializing in system reliability, infrastructure automation, and backend performance .
 - Proven expertise in Chaos Engineering on AWS to identify service-level dependencies and improve infrastructure stability .
 - Currently bridging the gap between quality and reliability by leveraging OpenTelemetry, Terraform, Linux, and Docker to ensure high-availability microservices .
-

Technical Skills

- **Infrastructure & Cloud:** AWS, Terraform, Linux, Docker.
 - **Observability & Monitoring:** OpenTelemetry, New Relic, AWS CloudWatch.
 - **Reliability & Chaos:** Chaos Experimentation, AWS Boto3 (Python), Robot Framework.
 - **Languages & Databases:** Python, Java, SQL, Shell Scripting.
 - **Tools & CI/CD:** Jenkins, GIT, Postman, JMeter, Appium
-

Professional Experience

Entain India | *Senior SDET (SDET III)*

Dec 2023 – Present

- Driving cross-team collaboration across QA, Backend, and Platform Loyalty teams to accelerate feature delivery and improve release reliability.
- Helping in test automation strategies for frontend and backend, enabling teams to adopt scalable frameworks and CI pipelines.
- Mentoring fellow QA's on Automation, Delivery roadmap
- Participating in technical hiring and interview processes improvements

Plivo Communications | *SDET II (Senior)*

May 2021 – Dec 2023

- **Chaos Engineering:** Implemented chaos testing on AWS infrastructure using Python and Robot Framework to identify and resolve service-level dependency failures.
- **Observability:** Established backend service-level monitoring and automated alerts to maintain infrastructure stability.

- **Automation Strategy:** helped in developing a unified framework to automate SDK testing across 7 languages (Go, Python, Java, etc.) using Dockerized environments.
- **Infrastructure Management:** Managed QA infrastructure and conducted performance testing for Voice-API backend features.

Gojek | *Quality Engineer*

April 2020 – April 2021

- **Backend Validation:** Executed functional testing and API response verification for the GoBiz merchant-partner ecosystem.
- **System Integrity:** Validated frontend UI components against backend API behavior to ensure seamless user experiences.

Sporta Technologies (Dream11 / Fancode) | *SDET /*

August 2018 – April 2020

- **Performance Engineering:** Led performance and integration testing for high-traffic fantasy sports platforms, successfully shipping 15+ major features.
- **Platform Orchestration:** Automated frontend UI and backend services using Appium and Detox, including complex data seeding for multi-sport aggregators.

QualityKiosk Technologies | *Senior Solution Engineer*

March 2016 – August 2018

- **Resilient Automation:** Developed an "Auto-Healing" PoC for mobile automation, allowing scripts to adapt to property changes at runtime to meet strict client SLAs.
- **Modernization:** Managed the migration of 550+ legacy test scripts to Selenium WebDriver 3.

Education (intension to move from Technical Specialist to a Strategic Architect)

- **MBA in Business Analytics** | Amity University (Pursuing Current AVG of 2 sems 6.4 GPA)
- **B.E. Computer Science & Engineering** | K.C. College of Engineering (70%)
- **Diploma in Computer Technology** | Terna Polytechnic (60%)

Certifications

- **AWS Certifications** - udemy and Tutorials point
- **Chaos Engineering** - Udemy
- **SRE Fundamentals: Mastering Site Reliability Engineering** - Udemy
- **GenAI & AI Agents for QA Automation** - Udemy
